6 POINT

Check these quality features:

- Hot broached sockets.
- Smooth thin walls of uniform thickness.
- Chamfered at the engaging and drive ends of the socket for fast smooth assembly of the fitting to the socket and the socket to the work.

8 POINT

- Four deep retaining grooves in the drive end afford a positive lock-on feature of the fitting to the socket without positioning.
- Completely chrome plated and polished.

REVERSIBLE RATCHET

The simplified construction of this forged 30 tooth action ratchet assures trouble free operation. Easy maintenance is provided—merely remove the spring steel clip to clean the alloy steel gear. Has finger tip reversing action. Exceeds government torque requirements. Chrome plated and polished. Length 5".

NO. 6070 REVERSIBLE RATCHET

STD. PKG. 3. PKG. WT. .75 LB.

SWING HEAD HANDLE

The swing head handle is a versatile tool—spring tension holds the head at any preselected angle to 90°. Drilled for use with a cross bar to form a T handle. Chrome plated and polished. Length 6".

NO. 6050 6" SWING HEAD HANDLE

STD. PKG. 4. PKG. WT. .50 LB.

EXTENSIONS

Attached to a swing head handle or ratchet, these tools are indispensable in reaching work in out of the way locations.

12 POINT

Designed to efficiently handle the intermediate range of sizes, this popular grouping of sockets and fittings incorporate many outstanding features. The thin wall sockets are hot broached and accurately machined to exact size. Heat treated for lasting durability, each **Select** socket has 4 deep recesses in the drive opening to receive the spring loaded ball present in each **Select** fitting and handle—a firm lock-on, without positioning, results.

Modern professional craftsmanship presents handles and fittings of streamlined appearance, proper balance and comfortable design. All tools are chrome plated and polished.

COMBINATION WRENCHES

CHROME PLATED

These forged wrenches combine best features of open end and box end wrenches. Both ends of each wrench have identical size openings. The box end is offset 15° for greater clearance, while the open end has a 15° angle opening for work in tight places. Box end fits hexagon nuts or bolts while the open end will take care of both hexagon and squares.

Each wrench is chrome plated with polished heads and has a satin finished handle for firm gripping.

Use the box end for tight nuts—the open end for speed. Popular with the car owner, industrial and professional mechanics and for farm machinery maintenance. Box ends of Nos. 1069, 1070, and 1071 are 6 point. All other numbers are 12 point.

SERVATOOL

SALESMAKERS

NO. 6991

These modern merchandisers provide a variety of top selling tools in a concentrated area—they require only $\frac{1}{3}$ the space demanded by the conventional wall type display.

The boards are attractively finished in blue to provide a most effective background for chrome plated tools. Tool numbers and sizes are clearly and permanently silk screened on each panel. Pressure sensitive pricing stickers are supplied with each merchandiser.

IMPORTANT FEATURE—

The tool assortments on this display are optional—any selection of 6 standard *Select* junior size panels—13" wide by 31" high—can be mounted on the revolving base. Merely order 1 No. 5252 RB revolving base, only, and specify the regular *Select* boards you wish. We will build the counter display with the boards of your preference.

**PLANT
NO. 1**

It takes quality to build a reputation.....

Good reputations are earned as a result of much effort over a long period of years. We, at Indestro, put a high value on the reputation that has been earned in the past almost 50 years of manufacturing tools, acclaimed by mechanics the world over as tools of quality.

Making quality tools is an art. It takes careful planning and design by experienced engineers. It requires the skill of loyal workers who take pride in their work. It requires the use of the best materials and modern manufacturing methods.

In the future, as in the past, we shall keep our standards high. We will continue to use the best materials. Through continuous research we will improve design and manufacturing methods. We will keep our prices competitive. We will continue to make the best, ever better.
